

TRAGIC OCCURRENCE IN NEW YORK.

A German woman, who had been living in New York for some time, was found dead in her room, and the cause of her death was ascertained to be a large and excited crowd had gathered in the vicinity, each person having a different version of the case.

The neighborhood of Forty-seventh street and Broadway was the scene, on Saturday evening, of a terrible tragedy, a German woman having, it is believed, murdered her three children, and then attempted suicide. News of the affair soon spread, and in a short time a large and excited crowd had gathered in the vicinity, each person having a different version of the case.

The horrified man at once rushed into the street and gave the alarm. A crowd soon collected, and notice of the affair was conveyed to the Twenty-second Precinct Station House, but a short distance from the scene of the occurrence. Roundsmen McHenry with some officers was at once dispatched to the place, and Mrs. J. Lewis Smith and Robert Stewart summoned. On their arrival they examined the children and pronounced them quite dead, and then turned their attention to the woman.

Dr. J. Lewis Smith, a physician, who had been called to the woman's room, was the first to examine her. He found her in a state of unconsciousness, and the supposition that she had poisoned the children and then attempted her own life in the same manner. No trace of poison could be found, nor were there any traces of food, showing that the deceased had not partaken of nourishment for some hours previous to the commission of the act.

The exact means by which the children came to their death could not be determined by the physicians. The bodies were not distorted, as would have been the case had poison been used, nor were there any traces of violence visible. It was the impression that they had been suffocated in some manner.

Mr. Both, on being questioned, could only assign one reason for the commission of the act. For some time past the woman has been rather extravagant, and he has remonstrated with her upon the subject. A few days since he gave her \$20 bill, and she subsequently informed him that she had lost it. This he discovered to be an untruth, and on speaking to her about the matter she became much excited, and mutual recriminations followed. Since then she has seemed very low-spirited, and without doubt, while in this state of mind she conceived and executed the terrible crime.

The two younger children are the fruit of the illicit cohabitation of these persons. The girl, Caroline, was born while the woman was living with her husband. The latter is again married, and is at present living in another part of the city. The woman is of medium height, and aged twenty-six years. Yesterday morning she was conveyed to Bellevue Hospital, where she now lies in a critical condition. In the opinion of Dr. Smith, one of the physicians who was called in soon after the commission of the act, and who visited the woman after her removal to the hospital, her mental powers are completely prostrated, and it is doubtful if she will ever recover the use of her faculties.

Coroner Wiley has been notified to hold an inquest. Dr. Wooster Beach, Jr., will make a post mortem examination, and the exact cause of death will then be ascertained. The case is involved in much mystery. -New York Tribune of yesterday.

ELECTRICAL DISCOVERIES.

AND
GLORIOUS RESULTS.

DR. M. J. GALLOWAY, Electrical Physician, formerly the partner of PROFESSOR C. H. DOLAN, has after an absence of a year and a half from the city, during which time he has been engaged with PROFESSOR BOLLES, his father-in-law, in investigating the more subtle subject of Electricity as the GREAT CURATIVE AGENT, has resumed his successful practice at No. 142 South EIGHTH Street, where he is curing, with unparalleled success, the worst forms of acute and chronic diseases. In our many scientific experiments with the Electric, Galvanic, Electro-Magnetic, and pure Magnetic Currents and their numerous modifications on the bodies of various animals for the purpose of ascertaining the influence of the direct and indirect influence of each on the organization, we have demonstrated that Electricity is the vital element that it can be directed to any organ or part of the body, and even after the vital functions seem paralyzed, possesses the power of arousing dormant energies, equalizing the circulation, and restoring the system to a self-sustaining healthy condition.

The most satisfactory results follow our treatment. In some instances the disease of years' standing yields readily at the first touch of the electric element, while in others it requires a more protracted treatment. One very important feature of our treatment is that no drug is used in experimenting with disease. By means of an electrical test, an accurate diagnosis is given at once, determining the locality and character of the disease, and indicating the treatment to be pursued.

DR. P. SHELDON, of NEW YORK CITY, a scientific gentleman of ability, is associated with Dr. Galloway in the treatment of the disease. In some instances the disease of years' standing yields readily at the first touch of the electric element, while in others it requires a more protracted treatment. One very important feature of our treatment is that no drug is used in experimenting with disease. By means of an electrical test, an accurate diagnosis is given at once, determining the locality and character of the disease, and indicating the treatment to be pursued.

TO LADIES.—Our treatment is eminently successful in the female diseases. Mrs. C. H. BOLLES gives her valuable services to all lady patients. Having cured during the last twelve years FIFTY THOUSAND females suffering with every form of disease peculiar to their sex, her ability to cure is well established. Her great experience recommends her to the suffering of her sex. We refer to the diseases and other ailments interested in our new practice to the following well-known gentlemen, who have been treated successfully by us:—
